

# TAG<sup>®</sup> 8000

**"THROW AND GO"**

## PERMANENT HIGH PERFORMANCE COLD MIX

**TAG<sup>®</sup> 8000** is a specially designed **all weather pothole patching material**. It will adhere in sub-zero temperatures and in the wettest conditions. It is proven on local roads, arterial roads, and highways with variable traffic volumes and loads. **TAG<sup>®</sup> 8000** is **tested and rated #1** by the United States Department of Transportation. **TAG<sup>®</sup> 8000** is permanent, easy to install, and cost effective. Installation can be completed with ease in the rain and snow. Unlike other cold mixes, no tack coat agents are required and **TAG<sup>®</sup> 8000** does not have to be removed prior to asphalt pavement overlays.

**SPECIFICATION** Recommended crushed aggregate gradations or as  
**CONFORMANCE** approved by Canadian Construction Products

Screen Size	% of passing
3/8"	90-100
#4	20-55
#8	0-30
#16	0-10
#50	0-5
#200	0-2

**STOCKPILING** TAG<sup>®</sup>8000 can be stocked as an uncovered pile of 100 tonnes for up to one year. For cold weather installations, place material in dump truck and store indoors overnight.

**TESTING** ASTM D-2172 Extraction of asphalt. 3.2 - 7% max.  
ASTM D-1664 Coating and stripping tests for both wet and dry aggregates

**PREPARATION** Asphalt and road base surfaces should be free and clear of loose dirt and organics. Snow and ice should be melted or removed prior to placement of material. Loose rocks larger than 1.5 inches in diameter should be removed prior to placement to prevent "punch through". Remove any material that could serve as a significant bond breaker with the existing asphalt or concrete.

**INSTALLATION** 1) Fill with TAG<sup>®</sup>8000  
2) Wheel roll or tamp with shovel.  
3) Open to traffic.  
Large / Deep Repairs  
Follow above instructions, but place TAG<sup>®</sup>8000 in 2" or 3" lifts and tamp with vibratory compactor.

### CURRENT PRICING

**1 Pallet \$950.00 ea.**  
**24 pails per pallet, 22.5 kg per pail.**  
**Pail life minimum 1 year.**

All prices in US dollars, taxes extra  
effective August 1, 2007  
Pallets F.O.B. Surrey, B.C. Canada

Product warranted against  
manufacturing defects at time of delivery.

**TAG<sup>®</sup> 8000** is the original high performance longest lasting cold mix of Canada. It is up to **5 times more cost effective** than conventional cold mix pothole patching material. The ease of install (just place, compact and leave), **reduces labour, material, and equipment costs**. No special preparation work, tools, or materials required.
