
43 (SILANE-SILOXANE) - CONCRETE AND BRICK WATER REPELLENT

DESCRIPTION AND USES:

43 is a clear solvent-based solution formulated for use on concrete and brick as well as other masonry surfaces to provide a water repellent natural finish. The 43 solution flows like water and is used to achieve deep surface penetration. It can be applied to: Concrete, precast concrete, stucco, ornamental stone, terra cotta, artificial exterior products, brick walls.

OUTSTANDING FEATURES:

- Water repellency protection.
- Retains and enhances natural finish.
- Deep penetration of surface
- Non-gloss finish, 15% solids content.
- Will not flake, peel or crack.
- Allows surface to breathe.
- On buildings and other structures 43 prevents water penetration and significantly reduces the problems associated with water movement into and within the substrates such as deterioration, efflorescence, mildew, staining, rebar corrosion and freeze/thaw damage. On bridge decks, parking garages and side walks, 43 prevents internal corrosion and deterioration by keeping water and salt out of the concrete.
- **43** will effectively protect the brick, block, mortar, stucco and concrete in your structure. As the carrier solvent evaporates, it begins to acquire water repellent qualities.
- **43** cannot be detected; however, within 12 to 24 hours the construction material begins to acquire water repellent qualities.
- Within 5-7 days the chemical reaction is essentially completed and the surface and substrate is water repellent.

DIRECTIONS:

Remove dirt, grease, oil, efflorescence film and other foreign material from surface. Apply 43 working from top to bottom using a brush, roller or low pressure sprayer.

PRECAUTIONS:

Keep away from heat and open flame. Protect eyes, should contact occur, flush thoroughly with water.

COVERAGE:

Depending on surface conditions:

Very Porous: Approximately 100 Sq.Ft./4 Litre

Smooth: Approximately 150 Sq.Ft./4 Litre

PACKAGING:

43 is available in 20 Litre (5 Gal.) pails and 200 litre (50 Gal.) drums. 7 Year life expectancy.

GUARANTEE:

Miton Products are guaranteed 100% when used according to the manufacturer's specifications. Product application and surface condition are beyond the manufacturer's control. Liability, if any, is limited to replacement of this product only.

(Buyer assumes all risk in use and handling)
