### PRODUCT DATA SHEET

# WHISPER-PAVE™

February, 1996.

#### READ BEFORE USING THIS PRODUCT

#### GENERAL

Whisper-Pave™ is a high quality self draining paving mix.  
 Whisper-Pave™ is designed for areas with high precipitation. The open graded texture of the mix allows the surface to dry quickly minutes after a rain. The smooth surface allows for an excellent traction surface.

#### SPECIFICATION CONFORMANCE

The Whisper-Pave™ binder consists of a uniquely modified asphalt cement. The aggregate for Whisper-Pave™ should be a clean washed gravel with the following gradation:

Sieve Size	Percent passing
12.5 mm	100
9.5 mm	95-100
4.75 mm	20-30
2.36 mm	8-12
1.18 mm	5-9
0.600 mm	3-6
0.300 mm	2.5-3.5
0.150 mm	2-3
0.075 mm	0-2

The final job mix formula (JMF) will be determined by Infratech Polymers Inc. laboratory.

#### PROPERTIES

1. Free drainage feature maximizes court utilization
2. No tack coat required
3. Excellent skid resistance
4. Extremely good adhesion of binder to aggregate
5. Easy to compact to 100%

#### INSTALLATION

Drainage channels should be prepared (saw cut) across the entire surface perpendicular to the fall line. Channels should be 300 mm wide with a depth to the base course. Channels should be protected with waterproofing barrier trench and filled with Whisper-Pave™.  
 Tack coat is not required for the level course. The surface should be simply swept, or pressure washed. The level course should be minimum 40 mm of uniformly compacted Whisper-Pave™. The surface course overlay should be placed in a single lift producing a compacted mat thickness of 25 mm over the level course.  
 Installation of retaining curb around the paved surface is recommended in order to prevent deterioration of edges. Either concrete curb or metal can be used.

#### WARRANTY

INFRATECH POLYMERS INC. warrants that Whisper-Pave™ meets applicable ASTM, Federal State or Provincial specifications at time of delivery.
